**Global Sky
Publishing Company**

Dear Global Sky Publishing,

This letter is to acknowledge that payment has been received to The Alliance for International Reforestation, Inc. (AIR) from Eco-Libris, in order to plant 160 trees on your behalf in Guatemala.

AIR has been in collaboration with Eco-Libris for almost three years now, and Raz Godelnik faithfully sends payments to AIR which we use directly in the tree-planting projects. AIR incorporates five-years of farmer training with the planting of trees, which is why these trees are not simply cut down, but remain on the mountain slopes indefinitely, benefitting the local residents as well as the entire planet. I am enclosing a recent photograph of Don Enrique with an AIR technician, Luis, standing on a mountaintop in Guatemala which they have reforested with pine trees, working together.

We are pleased to be a part of this creative collaboration with Eco-Libris, and your continued partnership is especially exciting, enabling AIR to plant even more trees during this summer planting season. Thank you!

For the Earth,

Anne Motley Hallum
Chair of the Board of Directors
The Alliance for International Reforestation, Inc.
